Reasons for Allowance

1. Claims 1-36 are allowed over prior art of record.

The following is an examiner's statement of reasons for allowance:

The present invention is directed to maintain a common network topology database at different nodes in a distributed computing environment. The unique method steps include "discontinuing sending of group connectivity messages for the time period when there is no topology change within the distributed environment and reinitiating, upon identification, by the group leader, of one topology change within the distributed environment utilizing a node common to both groups of nodes".

The closest prior art, Liang et al. (US 5,732,086) and Stirpe et al. (US 5,805,578) disclose a conventional method to curb the changing topology of data processing nodes where an originating node transmits an initial ID message over each interconnect link, message is acknowledged, and the node constructs a topology entry and updates and transmits to all other nodes hence enabling all nodes in the system.

However, the prior art of record, either singularly or in combination, fail to anticipate or render the above underlined limitation obvious.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
